#### General Information

SEB SICAV 1 (the "Company") is a Luxembourg open-ended investment company with variable share capital, organised in the form of a SICAV under the Luxembourg law of 10 August 1915 on commercial companies, as amended ("1915 Law"), and governed by Part I of the Luxembourg Law on Undertakings for Collective Investment of 17 December 2010, as amended, (the "Law"). The Company qualifies as an Undertaking for Collective Investment in Transferable Securities (UCITS). The Company was incorporated on 7 November 1990 for an unlimited duration as a public limited company ("société anonyme"). The Articles of Incorporation were published in the "Recueil Spécial des Sociétés et Associations" (hereafter "Mémorial C") on 20 December 1990. The Articles of Incorporation lastly modified with effect from 29 March 2019 have been published in the Recueil Electronique des Sociétés et Associations (RESA) on 16 April 2019. The Company is registered with the RCS under the number B 35166. The Company is managed by SEB Investment Management AB (the "Management Company"). The Management Company was established on 19 May 1978 in the form of a Swedish limited liability company (AB). The Management Company is authorised by Finansinspektionen for the management of UCITS and for the discretionary management of financial instruments and investment portfolios under the Swedish UCITS Act (SFS 2004:46). The Management Company is also authorised as an alternative investment fund manager to manage alternative investment funds under the Swedish AIFM Act (SFS 2013:561).

The Management Company has delegated parts of the Central Administration as further detailed hereafter, including the administrative, registrar and transfer agent functions - under its continued responsibility and control - at its own expenses to The Bank of New York Mellon SA/NV, Luxembourg Branch, 2-4, rue Eugène Ruppert, L-2453 Luxembourg. This branch was created in Luxembourg as a "succursale d'une société de droit étranger" on 15 December 1998 and is an indirect whollyowned subsidiary of The Bank of New York Mellon Corporation. It is registered with the Luxembourg Trade and Companies' Register under Corporate Identity Number B 105087 (the "Administrative Agent" and "Registrar and Transfer Agent").

In the capacity of Administrative Agent, it carries out certain administrative duties related to the administration of the Company, including the calculation of the NAV of the Shares and the provision of accounting services for the Company.

In its capacity as Registrar and Transfer Agent, it will process all subscriptions, redemptions and transfers and conversions of Shares and will register these transactions in the Investors' register of the Company.

The main objective of the Sub-Fund is to invest directly and/or indirectly in transferable securities and other Eligible Assets, with the purpose of spreading investment risks and achieving long-term capital growth. The investment objectives of the Sub-Fund is carried out in compliance with the investment restrictions set forth in the latest prospectus.

At present, one Sub-Fund is at the Investors' disposal:

Sub-Fund name:	Base currency:
SEB Emerging Markets Fund	USD

The base currency of the Company is USD.

Unless otherwise laid down in part II of the Prospectus, "The Sub-Fund", the Company may decide to issue capitalisation Shares ("C" Shares) and distribution Shares ("D" Shares).

The "C" Shares will reinvest their income, if any. The "D" Shares may pay a dividend to its Investors, upon decision of the Company. Dividends are paid annually, except where the Company would decide on a monthly, quarterly or semi-annual dividend payment.

The share classes offered for the Sub-Fund are disclosed in note 2 of this Annual Report.

The last known issue and redemption prices may be downloaded from the Website of the Branch and/or requested at any time at the registered offices of the Company, of the Management Company and of the Depositary, at the address of its Branch as well as from the paying agents.

In addition, the Net Asset Value, fact sheets and other informational material is published on the SEB Luxembourg website www.sebgroup.lu ("website"). When registered in other countries, the publication media might differ according to the regulatory requirements. Information about fund charges can be found in the Key Information Document ("KID").

The audited annual and unaudited semi-annual reports of the Company may be obtained free of charge, at the registered office of the Management Company, at the address of its Branch and on the website. These reports as well as copies of the Prospectus, the Articles of Incorporation and the KID are available, free of charge, at the registered office of the Management Company, at the address of the Branch and on the website.

### Management Report

#### January 2024 – December 2024: Lower inflation, AI optimism, and hopes of a soft landing propel risk assets higher

2024 was another year characterised by US exceptionalism. The US economy grew at a steady pace albeit slightly slower than in 2023, while the economic recoveries of Europe and China failed to materialise. Inflation continued to decline but at a much slower rate than in the previous year, primarily due to persistent service inflation. Central banks began cutting interest rates from historically high levels as inflation eased, but the reductions fell short of investor expectations. Uncertainty remained elevated throughout 2024, driven by political elections, geopolitical conflicts in Europe and the Middle East, and concerns over tariffs.

The US economy remained on track for a soft landing, with inflation gradually declining while growth held up. US economic growth was surprisingly strong despite the highest borrowing costs in over two decades. This resilience was largely driven by solid consumer spending, supported by real wage growth and a tight labour market. Business investment remained positive, bolstered by strong corporate balance sheets, fiscal support from the CHIPS Act and Inflation Reduction Act, and a surge in AI-related capital expenditure. However, the US manufacturing sector continued to struggle amid weak global demand.

The Federal Reserve held interest rates steady for most of the year as the economy remained resilient and inflation stayed elevated. However, in September, the Fed cut rates by half a percentage point, its first reduction in four years, to support growth amid signs of a weakening labour market and inflation approaching the two per cent target. Central banks in Sweden and Europe also cut rates amid declining inflation to boost economic growth. China eased monetary policy and announced stimulus measures in September to bolster its struggling economy, as property market woes weighed on consumer confidence, consumption, and investment. Despite these policy efforts, China's anticipated recovery stalled.

US equities saw the largest gains, driven by a surge in technology companies, a resilient economy, and Fed rate cuts. Donald Trump's landslide victory in the US election further fuelled the rally in US equities, pushing the S&P 500 to new highs, as anticipated deregulations and tax cuts were expected to boost US growth. European stocks rose at a slower pace than US stocks due to weaker growth, political uncertainty in France and Germany, and concerns over geopolitical conflicts and tariffs. Despite heightened geopolitical uncertainty, a mixed economic environment, and a stronger US dollar, most emerging market equities gained in 2024. Chinese stocks rebounded by 16% in local currency after years of weakness, following a shift in government policy in Q3 that included large-scale monetary and fiscal stimulus to stabilise its weak real estate and equity markets. Commodity prices, as measured by Bloomberg's broad commodity price index, were almost flat overall, but performance diverged across different commodities. Gold surged by 27%, reaching a new all-time high, primarily driven by stronger demand from both central banks and investors seeking safe havens amid geopolitical uncertainty.

Financial markets experienced a few periods of heightened volatility during the year, notably in early August following a weak US jobs report and an unexpected rate hike by the Bank of Japan, which contributed to a market sell-off. However, markets rebounded quickly, shrugging off the initial growth concerns after subsequent economic data mostly exceeded expectations.

Long-term US bond yields increased as expectations for rate cuts diminished, driven by stronger-than-expected economic performance, persistently high service-sector inflation, and Trump's anticipated economic policies. This also contributed to a stronger US dollar. Corporate bonds performed well despite rising government bond yields, thanks to narrowing credit spreads.

Looking ahead, US growth is expected to slow in 2025, while the European economy is anticipated to improve gradually, keeping the global economy on track for a soft landing. Broader corporate profit growth should be positive for equities. However, US rate cuts are likely to be limited due to uncertainty surrounding inflation, while bond yields may rise further, particularly in the US, driven by a solid economy and reflationary policies. Elsewhere, monetary policy easing should support economic growth as inflation subsides, benefiting markets.

In the absence of a recession, equities are expected to outperform bonds as rising corporate profits and lower interest rates provide a tailwind. While credit spreads may widen slightly, they are expected to remain tight. However, uncertainty remains high, particularly with regard to the risk of a trade war, which could weaken global growth, drive inflation higher, and push bond yields up. Although geopolitical tensions, particularly in relation to tariffs, remain a concern, underlying economic fundamentals point to a moderate growth outlook. Given these factors, we are maintaining a modest pro-risk stance and entering the year with a more balanced portfolio.

2024 was a strong year for SEB Asset Management with robust fund performance driving inflows, resulting in growth in its assets under management. SEB Asset Management remains committed to delivering a brighter financial future for its customers through sustainable investments. On behalf of SEB Asset Management AB and our board of directors, we thank you again for your continued commitment. As always, we are here to assist should you have any concerns.

Luxembourg, 6 February 2025

	SEB Emerging Markets Fund USD
Performance in % *)	
"C (EUR)" shares	17.4
"C (USD)" shares	10.3
"UC (EUR)" shares	18.3
"UC (USD)" shares	11.2
"ZC (EUR)" shares	18.7

<sup>\*)</sup> Performance is calculated by the following formula: ((Year end closing NAV per share or last NAV calculated in case of terminated classes + dividend per share distributed respectively for D shares) / (Prior year closing NAV per share or first NAV per share in case of newly launched classes) - 1) \* 100.

#### NAV = Net Asset Value

The past performance is no indication of current or future performance. The performance data do not take account of the costs incurred on the issue and redemption of shares.

## Notes to the Financial Statements As at 31 December 2024

#### Note 1. Significant Accounting Policies

The financial statements have been prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investment.

The financial statements have been prepared based on last official Net Asset Value of the year which has been calculated on 30 December 2024 with the prices of that date.

Investments are valued as follows:

Investments	Last available price	Administrative Agent	Last available settlement prices	A price no lower than the bid price and no higher than the ask price	Latest available forward exchange rates
Listed Transferable securities and money markets instruments	X				
Unlisted Transferable securities and money markets instruments				Х	
Derivatives instruments			Х		
Exchange Traded Funds	Х				
Financial Futures Contracts*	Х				

<sup>\*)</sup> Financial Futures Contracts, which are not matured, are valued at valuation date at market rates prevailing at this date and resulting unrealised appreciation or depreciation are posted as change in net unrealised appreciation/(depreciation) on financial future contracts to the Statement of Changes in Net Assets.

In the event that such prices are not in line with market conditions, or for securities and money market instruments other than those covered above for which there are no fixed prices, these securities and money market instruments, as well as other assets, will be valued at the current market value as determined in good faith by the Company, following generally accepted valuation principles.

Derivatives instruments not traded on regulated markets or on stock exchanges are valued at their net liquidating value determined, pursuant to the policies established in good faith by the Company, on a basis consistently applied for each different variety of contracts, in accordance with generally recognised principles, taking into consideration the generally accepted accounting practices, the customary practices in line with the market and the interests of the Investors.

In the case that extraordinary circumstances occur which make it impossible or even wrong to make a valuation in accordance with the above-mentioned criteria, the Company is entitled to temporarily apply other generally accepted valuation procedures, which are determined by it in good faith, in order to make an appropriate valuation of the Company's Assets.

Gains and losses on the sale of securities are determined using the average cost method.

#### Swing pricing:

When substantial sums flow in or out of a Sub-Fund, the Investment Manager has to make adjustments, such as trading on the market, in order to maintain the desired asset allocation for the Sub-Fund. Trading can incur costs that affect the Share price of the Sub-Fund and the value of existing Investors' investments. Swing pricing is designed to protect Investors' investments in this kind of situation.

The Share price of the Sub-Fund may thus be adjusted upwards in case of large inflows and downwards in case of large outflows on a certain Business Day. The thresholds that trigger swing pricing as well as the size of the adjustments ("swing factor") are set by the Board of Directors of the Company or by a swing price committee appointed by the Board of Directors of the Company.

Adjustments made during the year are recorded in "Proceeds on issues of shares" and "Payment on redemptions of shares" in the Statement of Changes in Net Assets.

The Board of Directors of the Company or swing price committee may also decide a maximum swing factor to apply to a specific Sub-Fund. The list of Sub-Funds that currently apply swing pricing, including the size of a maximum swing factor, is available on SEB Investment Management's website. Investors may also request this information, free of charge.

Fund	Sub-Fund	Maximum applied adjustment
SEB SICAV 1	SEB Emerging Markets Fund	0.99% of NAV

No swing pricing adjustment has been applied to the year end Net Asset Value per share calculated on 30 December 2024.

#### **Currency translation:**

Separate accounts are maintained for the Sub-Fund in the currency in which the Net Asset Value per share to which it relates is expressed (the "accounting currency").

Transactions denominated in a currency other than the accounting currency are recorded on the basis of exchange rates prevailing on the date they occur or accrue to the Sub-Fund.

Assets and liabilities, expressed in a currency other than the accounting currency, are translated on the basis of exchange rates ruling at the balance sheet date.

The Sub-Fund is priced at close of business. The exchange rates are presented in line with when the Sub-Fund is priced.

As at 30 December 2024, the close of business exchange rates for SEB Emerging Markets Fund were as follows:

1 AED	=	0.272260367 USD	1 KRW	=	0.000679279 USD
1 BRL	=	0.160678393 USD	1 MXN	=	0.048794805 USD
1 CLP	=	0.001006710 USD	1 MYR	=	0.223913588 USD

1 GBP	=	1.251050000 USD	1 SEK	=	0.090552449 USD
1 HKD	=	0.128817521 USD	1 THB	=	0.029329814 USD
1 HUF	=	0.002523520 USD	1 TRY	=	0.028299561 USD
1 IDR	=	0.000061977 USD	1 TWD	=	0.030538553 USD
1 INR	=	0.011691291 USD	1 ZAR	=	0.053269379 USD

#### Income:

Interest income and bank interest income are recognised on an accrual basis. Dividends are recorded on the ex-dividend date. This income is shown net of any withholding taxes and adjusted accordingly when tax reclaims apply.

#### Note 2. Management Fees

The share classes currently offered for the Sub-Fund of SEB SICAV 1 are listed below. In payment of its services, the Management Company receives a management fee at an annual rate as follows:

Sub-Fund name: SEB Emerging Markets Fund*	<b>ISIN</b> LU1526357881	Share Class C (EUR)	Effective rate % 1.50
SEB Emerging Markets Fund*	LU0037256269	C (USD)	1.50
SEB Emerging Markets Fund*	LU1808747478	UC (EUR)	0.75
SEB Emerging Markets Fund*	LU2249630687	UC (USD)	0.75
SEB Emerging Markets Fund*	LU1732232001	ZC (EUR)	0.45

<sup>\*</sup>Effective from 1 February 2024 the effective management fee for SEB Emerging Markets Fund Unit Classes C reduced from 1.75% to 1.50%, Unit Classes UC reduced from 0.875% to 0.75% and Unit Class ZC reduced from 0.53% to 0.45%.

A twelfth of this rate is being payable at the end of each month and based on the average Net Assets of the Sub-Fund calculated daily during the relevant month.

The Management Company pays accounting, administration and depositary fees on behalf of the Company.

#### Note 3. Taxation

The Company is liable in Luxembourg to a subscription tax ("taxe d'abonnement") of 0.05% or 0.01% (as applicable) per annum of its NAV, such tax being payable quarterly on the basis of the value of the aggregate Net Assets of the Sub-Fund at the end of the relevant calendar quarter. Investments by the Sub-Fund in shares or units of another Luxembourg undertaking for collective investment which are also subject to the taxe d'abonnement are excluded from the NAV of the Sub-Fund serving as basis for the calculation of this tax to be paid by the Sub-Fund.

No stamp duty or other tax is payable in Luxembourg on the issue of shares.

Interest, dividend and other income realised by the Sub-Fund on the sale of securities of non-Luxembourg issuers, may be subject to withholding and other taxes levied by the jurisdictions in which the income is sourced.

#### **Indian Tax**

Each Company may be subject to corporation taxes in certain countries in which it invests. Capital gains realised when disposing of Indian securities held by the Sub-Fund are subject to capital gains tax in India, which is disclosed in the Statement of Operations under the heading "Other expenses". The tax is computed on net realised gains, and realised losses in excess of gains may under certain conditions be carried forward for up to 8 years to offset future gains. In this respect, short term capital losses (i.e. when shares are held for less than 12 months) can offset either long term or short term capital gains whereas long term capital losses may only offset long term capital gains. The Finance Minister of India presented the Finance Bill for the fiscal year 2024/25 (Bill) in the Indian Parliament on 23 July 2024, proposing changes to tax laws. Prior to these changes and effective until 22 July 2024, Indian tax law imposes a tax of 15% on net realised gains from Indian securities sold within one year from the date of purchase and a tax of 10% if the Indian securities are sold more than 12 months after the acquisition. Effective from 23 July 2024 Indian tax law imposes a tax of 20% on net realised gains from Indian securities sold within one year from the date of purchase and a tax of 12.5% if the Indian securities are sold more than 12 months after the acquisition. As at 31 December 2024, no tax accrual was booked in relation to unrealised capital gains tax on Indian securities, the potential tax liability on Indian securities was not significant on the Net Asset Values of the concerned Sub-Fund.

In case the Company incurred a total realised loss on security sales as at fiscal year-end, the Company could recover the taxable amount paid during the year on net realised gains, provided that a claim to the Tax Administration is introduced within 2 years as from end of the financial years.

#### Note 4. Transaction Fees

Transaction fees incurred by the Company relating to the purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of depositary fees and broker fees. Most of the transaction fees are included in the transaction price used to calculate the realised and unrealised gain/(loss) on securities. In line with bond market practice, a bid-offer spread is applied when buying or selling securities and other financial instruments. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's remuneration. This type of transaction cost is difficult to obtain separately and is therefore included in the acquisition cost of securities or deducted from selling prices of bonds.

As at 31 December 2024, the transaction fees were as follows:

SEB Emerging Markets Fund

293,186.60 USD

#### Note 5. Significant Events during the year

A new prospectus was issued in January 2024, and a further new prospectus was issued in April 2024.

As of 1 April 2024, SEB Asset Management Sales (AMS) and SEB Asset Management Products and Solutions (AMPS) legally moved from Skandinaviska Enskilda Banken AB (publ) ("SEB AB") into the newly formed SEB Asset Management AB ("SEB AM"). As a result, the global distributor of SEB funds has now changed from SEB AB to SEB AM.

There were no other significant events during the year.

#### Note 6. Subsequent Events after the year end

A new prospectus was issued in January 2025.

Effective 1 January 2025 the Investment Manager changed from SEB Investment Management AB to SEB Asset Management AB.

Effective 14 March 2025 the name of the Management Company has changed from SEB Investment Management AB to SEB Funds AB.

There were no other subsequent events after the year end.

#### Independent auditor's report

To the Shareholders of SEB SICAV 1 4, rue Peternelchen L-2370 Howald, Luxembourg

#### **Opinion**

We have audited the financial statements of SEB SICAV 1 (the "Company"), which comprise the statement of net assets and the schedule of investments as at 31 December 2024, and the statement of operations and the statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2024, and of the results of its operations and changes in its net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### **Basis for Opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors of the Company for the financial statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

#### Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
  error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
  sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.

- Conclude on the appropriateness of the Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the
  disclosures, and whether the financial statements represent the underlying transactions and events in a
  manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Ernst & Young Société anonyme Cabinet de révision agréé

Cosimo Ruggiero

## Risk Disclosure (unaudited)

In the context of risk measurement and in accordance with CSSF Circular 11/512 a UCITS must calculate its global exposure on at least a daily basis.

For SEB SICAV 1, the global exposure is calculated and monitored daily by using the commitment methodology.

The Investment Manager calculates the leverage on a gross or on a commitment method. The gross method converts all positions on derivative financial instruments into equivalent positions in the underlying assets, while the commitment method applies the same while allowing netting and hedging arrangements.

The below overview summarises the minimum, maximum and average leverage within the commitment method:

Sub-Fund	Commitment Method Leverage				
	Limit Minimum Average Maximum				
SEB Emerging Markets Fund	100%	0.69%	1.50%	1.92%	

The risk monitoring is based on the risk management process adopted by the Board of Directors of the Management Company and is performed independently from the portfolio management. No changes have been applied to the risk management procedures.

## Remuneration Disclosure (unaudited)

SEB Investment Management AB wishes to encourage and incite good performance and sound behaviour, as well as to endeavour to achieve balanced risk-taking that is aligned with the interests of fund Investors.

The Management Company has a long-term vision regarding the employment conditions of its staff. Total remuneration shall contribute to developing the Management Company's competitiveness and profitability through the Company being able to attract, retain, motivate and reward competent and skilful employees. In order to achieve this objective, the Management Company's Board of Directors has adopted a remuneration policy based on Swedish and international regulations. The purpose of the remuneration policy is to ensure that the Management Company has a remuneration system that is adapted to the fund Investors' long-term interests and the Management Company's strategy and values.

The remuneration policy is based on the remuneration model that is applied at Group level, and is built on SEB's values. The Management Company's remuneration policy is reviewed at least annually. The Management Company's current remuneration policy is based on a risk analysis that has been prepared by the Management Company's risk control department.

#### The Management Company's remuneration structure is based on three components:

- Fixed remuneration (basic salary)
- Variable remuneration
- · Pensions and other benefits

The remuneration components are used to achieve a competitive individual level of remuneration with an appropriate balance between fixed and variable remuneration.

The fixed remuneration component is individually adapted further to predetermined internal and external appraisals. The level of the fixed remuneration is based on the employee's experience, long-term performance and behaviour.

All employees at the Management Company are embraced by SEB's collective profit sharing model that has a predetermined maximum outcome. The remuneration is established based on SEB's earnings and customer satisfaction.

Remuneration to employees in control departments (internal audit, risk control, and observance of regulations) is established by the Board of Directors further to proposals from the Management Company's remuneration committee. Remuneration shall be based on objective grounds related to the employee's role and tasks, and be independent of the business unit that the control department scrutinises.

Employees in departments that have a monitoring function, such as internal auditing, risk control or compliance, are not to receive any other variable remuneration over and above SEB's profit sharing.

The Management Company applies the grandfather principle to all remuneration, which means all decisions are to be approved by, at the least, the manager for the manager of the employee concerned.

#### Variable remuneration

The Management Company uses variable remuneration in order to develop and reward performance and behaviour that create both short-term and long-term value for the fund Investors and the Management Company. Variable remuneration is an important aspect of designing a flexible remuneration system. Variable remuneration is composed of both cash and shares in investment funds or financial instruments which achieve the equivalent common interests as shares in the relevant investment funds.

The principles for variable remuneration adopted by the Management Company are established with the objective of reflecting the Management Company's low risk tolerance and being compatible with the Fund's prevailing risk profiles, fund rules, discretionary mandates, as well as internal and external regulations. The variable remuneration shall be based on the employee's performance and behaviour from a several-year perspective, as well as the performance and economic results of the employee's team, the Management Company and SEB as a whole.

At the same time as obtaining a sound balance between fixed and variable remuneration, the payment of variable remuneration shall be related to the Management Company's risk policy and creation of value for the fund Investors. This implies that certain maximum levels and deferment of payment shall apply to different personnel categories.

For employees in positions that have a significant influence on the Management Company's or the managed funds' risk profile, the maximum variable remuneration may not exceed 100 percent of the fixed remuneration. The variable remuneration is to be deferred by 40 to 60 percent for a minimum of four years. At least 50 percent of the variable remuneration is to consist of shares in investment funds or instruments which achieve the same common interests as shares in the relevant securities funds. Variable remuneration in the form of fund shares will be subject to retention policy for at least one year. This retention policy applies to variable compensation whether or not it is deferred.

The Management Company also applies a special remuneration model for certain employees who manage funds and discretionary mandates. The remuneration model for these persons is based on a structure with distinct rules for maximum outcome of remuneration, deferment of remuneration as well as rules regarding downward adjustment/reduction of remuneration.

Payment of deferred remuneration shall only be made if such is motivated based on the Management Company's economic situation and the performance of the Management Company, the relevant division and the employee.

Reduction or downward adjustment of deferred variable remuneration shall apply should losses, increased risks and costs arise during the deferment period, which includes for example taking into consideration the employee's observance of external and internal regulations. Reduction or downward adjustment shall also take place should payment be deemed unwarrantable in view of the Management Company's financial situation.

The variable remuneration system shall be continuously reviewed in order to ensure that it does not create any unsuitable behaviour and contribute to excessive risk-taking.

#### The remuneration committee

The Management Company has appointed a remuneration committee with the task of independently appraising the remuneration policy. The remuneration committee shall be responsible for preparing decisions regarding remuneration that are to be adopted by the Board of Directors, and intervene if a decision could imply consequences for the Management Company's risks and risk management. The remuneration committee is an independent body composed of the Board of Directors' independent members.

#### Follow up

The CEO, the deputy CEO and the Board of Directors shall ensure that the remuneration policy is operationally applied. The remuneration policy shall be reviewed annually by the internal audit department or by an independent auditing firm. In order to ensure that the Management Company's remuneration system is applied in accordance with the remuneration policy, the remuneration system and the payment of remuneration shall be reviewed annually by internal or external auditors.

## Securities Financing Transactions Regulation (SFTR) (unaudited)

The Company did not engage in any Securities Financing Transactions during the financial year ended 31 December 2024.

## Sustainable Finance Disclosure Regulation (unaudited)

SEB Emerging Markets Fund is categorised as an Article 8 Fund under the Sustainable Finance Disclosure Regulation.

The periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 for SEB Emerging Markets Fund is disclosed overleaf.

#### **Product name:** SEB Emerging Markets Fund

Legal entity identifier: 529900 KHWX 88 NSY 80 C92

#### Environmental and/or social characteristics

Sustainable in vestment:
means an investment in an
economic activity that
contributes to an
environmental or social
objective, provided that the
investment does not
significantly harm any
environmental or social
objective and that the
investee companies follo w
good go vernance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic ac tivities. Sustainable in vestments with an en vironmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the 2024 reference period, the Sub-Fund promoted environmental and social characteristics as follows:

#### **Environmental Characteristics**

- By applying the Management Company's exclusion criteria:
   The Sub-Fund excluded in vestments in companies operating in industries or areas deemed to face significant challenges concerning en vironmental sustainability.
- By influencing com panies' business models towards greater environmental sustainability:
   On behalf of the Sub-Fund, the Management Company influenced companies by voting at general meetings, engaging in dialogues with management teams and boards, participating in nomination committees, and collaborating with other asset managers or partners.
- $\bullet \quad \text{By making sustainable in vestments in companies that support one or more of the following environmental objectives:} \\$

One or more of the following UNS ustainable Development Goals (SDGs):

- SDG 6: Clean water and sanitation
- SDG 7: Affordable and clean ene rgy
- SDG 9: Industry, innovation, and infrastructure
- SDG 11: Sustainable cities and communities
- SDG 12: Responsible consumption and production
- SDG 13: Climate action
- SDG 14: Life below water
- SDG 15: Life on land
- Climate change mi tigation through low emissions relative to the company's sector and geographical region.
- Resource efficiency concerning water usage, raw material consumption, or waste production relative to the company's sector and geog raphical region.

#### Social Characteristics

By applying the Management Company's exclusion criteria:
 The Sub-Fund excluded in vestments in companies operating in industries or areas that were deemed to face significant

challenges concerning social sustainability.

- By influencing companies' business models towards greater social sustainability:
  - On behalf of the Sub-Fund, the Managemen t Company influenced companies by voting at general meetings, engaging in dialogues with management teams and boards, participating in nomination committees, and collaborating with other asset managers or partners.
- By making sustainable investments in companies that support one or more of the following UN Sustainable Development Goals (SDGs) social objectives:
  - SDG 1: No poverty
  - SDG 2: Zero hunger
  - SDG 3: Good heal th and well-being
  - SDG 4: Quality education
  - SDG 5: Gender equality
  - SDG 6: Clean water and sanitation
  - SDG 8: Decent work and economic g rowth
  - SDG 10: Reduced inequalities
  - **SDG 11:** Sustainable cities and communities
  - SDG 16: Peace, justice, and strong institutions

Addi tionally:

- Gender equality, by investing in companies that are more equitable relative to their sector and geog raphical region.
- Gender equality, social inclusion, and diversity, by investing in companies assessed through fundamental analysis to contribute to these objectives.

For more information about the Managemen t Company's sustainability policy, exclusion criteria, methodology for assessing sustainable in vestments, and the SIMS -S sustainability model, please visit: Our sustainability approach at Asset Management

What were the objectives of the sustainable in vestments that the financial product partially made and ho w did the sustainable in vestment contribute to such objectives?

During the 2024 reference period, the Sub-Fund committed to making sustainable in vestments amounting to a minimum share of 10.00%.

The proportion of the Sub-Fund's sustainable in vestments during the 2024 reference period amounted to 45.90%, based on a weighted average of the Sub-Fund's sustainable in vestments per quarter.

Sustainability objectives defined by the Management Company

#### Social Objectives

- At least 20% of the company's revenues are assessed to contribute to global social goals directly or indirectly linked to the following UNSDG s:
  - SDG 1: No poverty
  - o SDG 2: Zero hunger
  - SDG 3: Good heal th and well-being
  - o SDG 4: Quality education
  - SDG 5: Gender equality
  - SDG 6: Clean water and sanitation
  - SDG 8: Decent work and economic growth
  - o SDG 10: Reduced inequalities
  - SDG 11: Sustainable cities and communities
  - SDG 16: Peace, justice, and strong institutions
- Companies outperform peers in the same region on gende r equality metrics based on quantitative data.
- Companies demonstrate a high contribution to and exposure to social objectives based on fundamental analysis. **Environmental objectives (aligned with the EU Taxonomy)**
- At least 10% of the company's revenues, capital expenditures, or operational expenditures are assessed or reported to significantly contribute to one or more of the six objectives in the EU Ta xonomy:
  - o Climate change mi tigation
  - Climate change ada ptation
  - ${\bf o}~$  Sustainable use and protection of water and marine resources
  - o Transition to a circular economy, including waste prevention and inc reased use of secondary raw materials
  - Pollution prevention and con trol
  - o Protection and restoration of biodi versity and eco systems

#### Environmental objectives not aligned with the EU Taxonomy

• At least 20% of the company's revenues contribute to global en vironmental goals, directly or indirectly linked to the following UNS ustainable De velopment Goals (SDGs):

- SDG 6: Clean water and sanitation
- SDG 7: Affordable and clean ene rgy
- SDG 9: Industry, innovation, and infrastructure
- SDG 11: Sustainable cities and communities
- SDG 12: Responsible consumption and production
- o SDG 13: Climate action
- o SDG 14: Life below water
- o SDG 15: Life on land
- Companies outperform their sector and region in emissions metrics based on quantitative data.
- Companies outperform their sector and region in resource efficiency areas such as water usage, raw material consumption, or waste production based on quantitative data.
- Companies demonstrate a high con tribution to and exposure to environmental objectives based on fundamental analysis.

The Managemen t Company applies a "pass/fail me thodolog y," where an entire investment is classified and reported as sustainable if it meets the requirement for contributing, social minim um safeguards, good go vernance, and avoiding significant harm.

How did the sustainable in vestments that the financial product partially made not cause significant harm to any environmental or social sustainable in vestment objective?

To ensure that no sustainable in vestment caused significant harm to any environmental or social sustainability objective, the Sub-Fund undertook the following actions during the reference period:

- Excluded companies that did not comply with international norms and standards.
- Excluded companies operating in controversial sectors and business areas.
- Excluded companies with exposure to fossil fuels or other activities with a negative environmental impact (green bonds supporting energy transition or other energy-efficiency projects are allowed).
- Excluded companies deemed not to meet the levels of social safeguards as defined by the EU Taxonomy.
- Relied on a ssessments from an external analysis partner regarding companies' governance structures, employment practices, tax compliance, and remuneration policies.
- How were the indica tors for adverse impacts on sustainability factors taken into account?

During the 2024 reference period, the Managemen t Company's model for identifying companies with extreme values among indica tors for adverse impacts was utilised to avoid in vesting in companies that cause significant harm.

The indica tors for adverse impacts on sustainability factors applied are those described in Anne x I of the technical standards of the Disclosure Regulation (CDR 2022/1288), as well as relevant indicators in Tables 2 and 3 of Anne x I to CDR 2022/1288. These indicators are dependent on the current availability of data. However, where sufficient data coverage existed, companies with significantly negative results in a geographical and sectoral context were excluded from being con sidered sustainable in vestments.

Some indica tors were addressed through exclusions outlined in the Managemen t Company's sustainability policy, which excludes:

- Companies operating in the fossil fuel sector;
- Companies with operations or facilities located in or near biodiversity-sensitive areas where their activities negatively impact these areas;
- Companies that fail to adhere to international norms and standards, such as the Ten P rinciples of the UN Global Compact and the OECD G uidelines for Multinational Enterprises;
- Companies involved in the manufacturing or sale of controversial weapons (e.g. landmines, cluster munitions, chemical, and biological weapons);
- Companies whose activities negatively affect endange red species.
- Were sustainable in vestments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Sub-Fund's investments during the reference period were aligned with the OECD G uidelines for Multinational Enterprises and the UN G uiding P rinciples on Business and H uman Rights through the norm-based exclusion criteria outlined in the Management Company's sustainability policy.

Norm-based exclusions mean that the managemen t company expects issuers to comply with international laws and conventions, such as:

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and em ployee matters, respect for human rights, anti- corruption and anti- bribery matters.

- The UNP rinciples for Responsible Investment (PRI);
- The Ten P rinciples of the UN Global Compact;
- The OECD G uidelines for Multinational Enterprises;
- The UNG uiding Principles on Business and Human Rights, including the principles and rights established in the eight core conventions identified in the International Labo ur Organization's Declaration on Fundamental Principles and Rights at Work, and the Universal Declaration of Human Rights.

 $Companies\ with\ verified\ violations\ were\ excluded\ and\ ,\ therefore,\ could\ not\ be\ considered\ sustainable\ investments.$ 

The EU Ta xonom y sets out a "do not significant harm" principle by which Ta xonom y-aligned in vestments should not significantly harm EU Ta xonom y objectives and is accompanied by specific Union c riteria

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable in vestments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the Sub-Fund considered principal adverse impacts on sustainability factors through the exclusions described in the Managemen t Company's sustainability policy, which excluded the following:

- Companies operating in the fossil fuel sector.
- Companies with facilities or operations located in or near biodiversity-sensitive areas where their activities negatively impact these areas.
- Companies that do not adhere to international norms and standards, such as the Ten P rinciples of the UN Global Compact and the OECD G uidelines for Multinational Enterprises.
- Companies involved in the production or sale of controversial weapons (landmines, cluster munitions, chemical, and biological weapons).
- Companies whose activities affect endange red species.

Sustainability assessment in the fundamental analysis process

In the fundamental analysis process, sustainability assessments were conducted on various aspects of each company, including its products, services, operations, and suppliers. To support the evaluation of companies' sustainability risks and opportunities, the fund manage rs utilised the management company's proprietary sustainability model, **SIMS-S**.

Through the application of SIMS -S, the following indicators for adverse impacts were considered:

- $\bullet$   $\,$  Greenhouse gas (GHG) emissions from the companies in which we invest.
- The carbon foo tprint of the companies in which we invest.
- The GHG in tensity of the companies in which we invest.
- The proportion of companies operating in the fossil fuel sector.
- $\bullet \quad \text{Energy consumption in tensity by sector with significant climate impact, for the companies in which we invest.}\\$
- Whether the companies in which we invest have operations or projects located in or near biodiversity-sensitive areas where activities negatively impact these areas.
- Water emissions generated by the companies in which we invest.
- The volume of hazardous waste generated by the companies in which we invest.
- Whether the companies in which we invest lack processes and compliance mechanisms to monitor adherence to the UN Global Compact's Ten Principles and the OECD Guidelines for Multinational Enterprises.
- The unadjusted gender pay gap within the companies in which we invest.
- Gender diversity on the boards of the companies in which we invest.
- Whether the companies in which we invest have initiatives to reduce carbon emissions with the goal of aligning with the Paris Agreement.
- Whether the companies in which we invest have a supplier code of conduct addressing unsafe working conditions, insecure employment, child labour, and forced labour.

#### What were the top investments of this financial product?

The Sub-Fund's weights are calculated excluding cash and cash-equivalents, which is why the weights in certain cases may appear slightly elevated.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1/1/2024--12/31/2024

Largest investments	Sector	% of assets	Country
Taiwan Semicond uctor Manufacturing Co Ltd	Information Technolog y	9.33	Taiwan
Samsung Electronics Co Ltd	Information Technolog y	3.27	South Korea

HCL Technologie s Ltd	Information Technolog y	1.48	India
Meituan Dian ping	Consumer Discretionary	1.43	China
China Life In surance Co L td	Financials	1.43	China
InterGlobe Aviation Ltd	Industrials	1.43	India

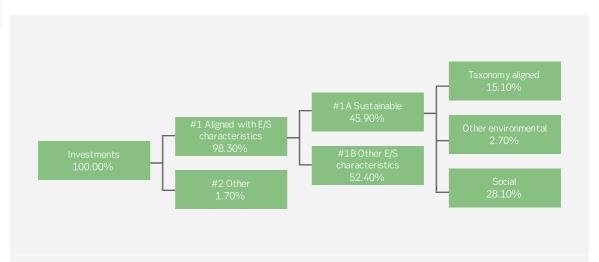

#### What was the proportion of sustainability-related investments?

The question is answered in the sub-questions below.

#### What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining in vestments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable in vestments.

The category #1 Aligned with E/S characteristics covers:

- -The sub-category #1A Sustainable covers sustainable in vestments with environmental or social objectives.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable in vestments.

#### In which economic sectors were the investments made?

If present in the portfolio, sub-sectors related to fossil fuel as specified by article 2.62 (EU) 2018/1999 are shown, otherwise only top-level sectors are shown.

Sector	% assets
Mixed	0.00
Materials	7.45
Industrials	8.11
Consumer Discretionary	12.83
Consumer Staples	4.13
Health Care	5.07
Financials	23.06
Information Technolog y	25.04
Communication Services	8.67
Utilities	2.32
Real Estate	3.32

To comply with the EU Taxonomy, the

criteria for **fossil gas** include limitations

on emissions and switching to fully renewable power or low-larbon fuels by the end of 2035.

For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned

- turnover reflecting the share of revenue from green activites of investee companies. - capital

activities are expressed as a share of:

expenditure (CapEx) showing the green

investments made by investee

companies, e.g. for

expenditure (OpEx)
reflecting green

a transition to a green econom y. - operational

operational activities of

investee companies

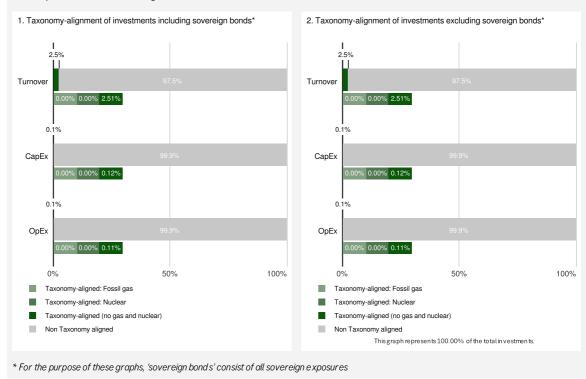

To what extent were the sustainable in vestments with an environmental objective aligned with the EU Ta xonomy?

The question is answered in the sub-questions below.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Ta xonom y<sup>1</sup>?

	Yes		
		in fossil gas	in nuclear energy
abla	No		

The graphs below show in green the percentage of investments that were aligned with the EUTa xonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling ac tivities?

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mi tigation") and do not significantly harm any EU Taxonomy objective — see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

During 2024, the share of investments in transitional activities was 0.08%. The share in enabling activities was 0.05%.

How did the percentage of in vestments that were aligned with the EU Ta xonomy compare with previous reference periods?

	Including sovereign bonds			Excluding sovereign bonds		
	2024	2023	2022	2024	2023	2022
Turnover	2.51%	0.05%	0.03%	2.51%	0.05%	0.02%
Capital expenditure	0.12%	0.07%	0.00%	0.12%	0.07%	0.00%
Operational expenditure	0.11%	0.05%	0.00%	0.11%	0.05%	0.00%

What was the share of sustainable in vestments with an environmental objective not aligned with the EU Ta xonomy?

During the period, the Sub-Fund had a proportion of sustainable in vestments with an environmental objective that was not aligned with the EU Ta xonomy amounting to 2.70%.

What was the share of socially sustainable in vestments?

During the period, the Sub-Fund had a proportion of socially sustainable in vestments amounting to 28.10%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reference period, the fund utilised cash and derivatives to manage liquidity and flows. The fund did not consider any environmental or social safeguards necessary for these investments during the reference period.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To mee't environmental and social characteristics, SIMS-S was used in portfolio construction. The sustainability rating was

incorporated into the decision-making process when selecting companies for the fund's investments. SIMS-S was applied both as an aggregated sustainability rating and through its component sub-ratings, where specific a spects of the sustainability score were emphasised when particular sustainability themes or criteria needed to be considered in the selection process. Companies with high sustainability scores according to SIMS-S were favoured during the investment selection process. Additionally, a minimum threshold was set for sustainability scores according to SIMS-S, excluding companies with insufficient scores from the fund's investments.

Examples of companies in the fund with high sustainability scores include NEPI Rockca stle N.V. and Rural Electrification Corp:

NEPI Rockca stle is a leading com pany in Central and Ea stern Europe that develops, owns, and operates shopping centres, office buildings, and industrial properties. The company has an industry-leading sustainability strategy, with the majority of its property portfoliogreen-certified under BREEAM. The certification encompasses the continuous development, construction, and operation of existing buildings, as well as the sustainable design of new constructions. The company is assessed as having negligible ESG risk by Sustainalytics, with high ratings for both environmental and go vernance initiatives. Nepi Rockcastle continuously invests in improving the energy efficiency of its facilities and has implemented renewable solar energy production on its properties. Additionally, the company has introduced smart water management systems to reduce water consumption and manage wastewater more efficiently. With these initiatives, along with several others, the company has developed a sustainability strategy that directly contributes to 10 of the UN's 17 Sustainable De velopment Goals.

Rural Elec trification Corp (REC) is a company under the administrative control of India's Ministry of Power. It operates across the entire Indian power infrastructure sector, including elec tricity generation, transmission, distribution, renewable energy, and emerging technologies such as electric vehicles, battery storage, and green hydrogen. REC has implemented several significant initiatives to promote environmental and social development. These include the installation of solar energy systems and wastewater treatment facilities, contributing to the UN's goals for climate action and sustainable energy for all. The company also runs initiatives in skill development, healthcare infrastructure, and educational programmes. For instance, REC has provided medical equipment to underserved regions and education for economically disadvantaged groups, supporting the goals of good heal th and well-being as well as quality education for all. Additionally, REC's governance practices emphasise transparency, accountability, and stakeholder engagement, aligning with the UN's Goal 16 for peaceful and inclusive societies.

#### Active Ownership

As active shareholders and in vestors, the Fund Company strive to serve the shared interests of our clients in ownership matters and engage with companies to encourage the development of their sustainability work. As shareholders, the Fund Company exercise active ownership by voting at general meetings, supporting or opposing specific shareholder or management proposals, and using proxy voting based on our principles for shareholder engagement.

In the Nordic region, the Fund Company can have direct dialoge with companies as we often are one of the larger investors. Outside the Nordic region, we collaborate with other investors through IIGCC, the PRI Collaboration Platform, Access to Medicine, the Global Child Forum, and other initiatives. The Fund Company also maintain direct dialogues with companies outside the Nordic region. The Fund Comapny partner with Sustainal ytics and Institutional Shareholder Services (ISS), two internationally leading entities in corporate engagement. These partners maintain ongoing, direct communication with the management and boards of the companies we invest in. By collaborating with other asset managers under the leadership of our partners, the Fund Company can be more effective in dialogues with companies outside the Nordic region, where ownership stakes are typically smaller.

An example of a company in the fund with which Sustainal ytics conducted engagemen t in 2024 is InterGlobe A viation Ltd:

InterGlobe Aviation is the largest player in India's aviation industry through its airline, Indigo Air. Engagement efforts with Indigo have focused on reducing emissions and strengthening human capital by retaining relevant expertise and increasing diversity within the company. Additional focus has been placed on enhancing the company's transparency in sustainability initiatives. During a meeting in August 2024, the company stated that its primary metric for emissions is emissions per available seat kilometers (number of seats multiplied by kilometers), which has been reduced in recent years. However, Indigo expressed skepticism regarding sustainable a viation fuel and hydrogen as viable solutions for reducing the industry's emissions. Instead, they see fleet modernisation as the most realistic path forward. Regarding its workforce, Indigo shared that it has one of the most gender-balanced pilot teams in the industry, with nearly 50% women. The company also emphasised that its gender pay gap is low and stated that it will prioritise achieving a more balanced gender distribution among senior executives in the future.

#### Additional Measures

In 2024 the sustainability team foc used on two main a reas of corporate engagemen t. A new focus area, chemical managemen t, was introduced. Companies that fail to manage their chemical s properly can cause significant negative impacts on both the environment and human heal th, making this a key theme for corporate engagemen t. Additionally, the existing efforts to combat corruption have been further developed. In this area, we are active members of the Investors Integrity Forum (IIF) and collaborate with other Swedish investors to fight corruption. This work is essential, as widespread corruption negatively impacts societal development. Over the past two years, the focus has particularly been on the real estate and construction sectors.

In 2024, new sustainability data providers were also analysed and procured. These acquisitions broaden perspectives on sustainability, improve the quality of existing data, and increase coverage. Examples include a new provider of gender equality data and the purchase of biodiversity data from an existing provider.

For more information about the Managemen t Company's sustainability policy, exclusion criteria, and assessment methodology for sustainable in vestments, please visit: <a href="Our sustainability approach at Asset Management">Our sustainability approach at Asset Management</a> | <a href="SEB">SEB</a></a>

Reference benchma rks are indexes to measure whether the financial product attains the environmental or social characteristics that they

promote.

## How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

- How does the reference benchmark differ from a broad market index?
  - The Sub-Fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?
  - The Sub-Fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
- How did this financial product perform compared with the reference benchmark?
  The Sub-Fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
